Acoustic Sense:

Stylish and functional

“Acoustic Sense” combines Scandinavian design with practical sound insulation, providing a pleasant room atmosphere, especially in modern living environments where curtains and other textiles are used sparingly. The technical construction of the panels with a felt back wall provides effective sound absorption and improves aspects such as speech comprehension and concentration for a truly comfortable environment. Partial covering of the wall or ceiling is enough for the sound-absorbing effect to make itself felt.

The base material is sound-absorbing black felt (100% vegan) with a high recycled material content of 70%. Narrow MDF strips with clean bevelled edges are glued onto the felt. Thanks to the bevels and the smooth, moisture-resistant surface, the panel is easy to clean and maintain. “Acoustic Sense” is suitable for humid rooms, meaning it can even be used in the bathroom.

— **Room height length of 2 600 mm**

— **Handy width of 330 mm**

— **Simple cleaning and care**

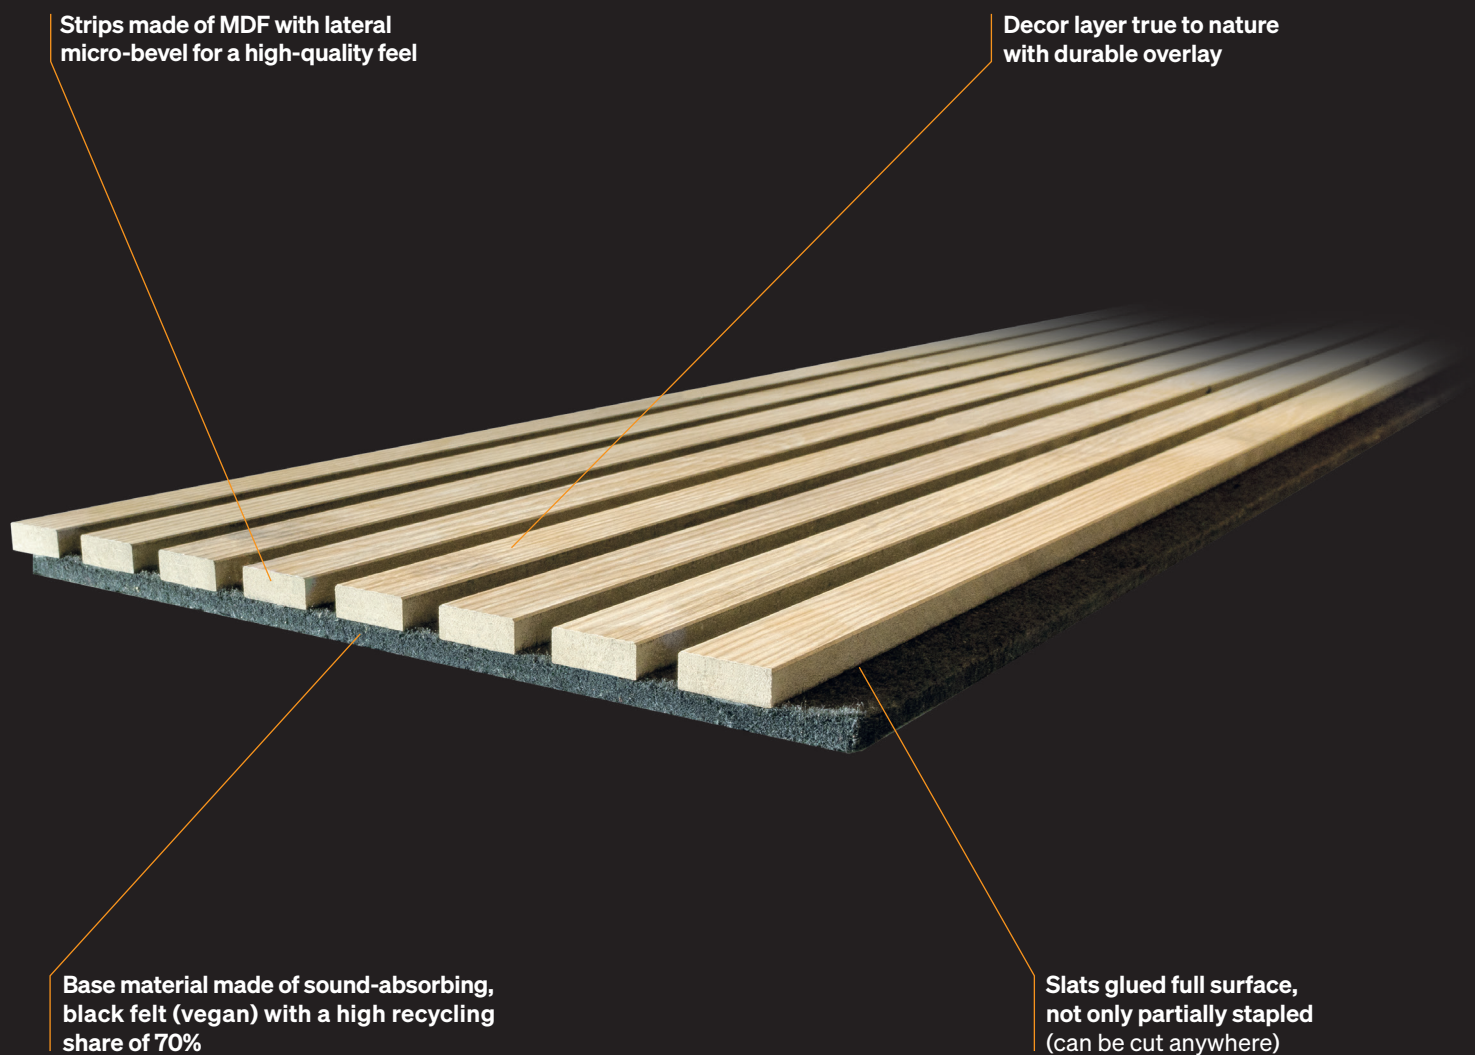

— **Suitable for humid rooms**

— **Simple installation: glue or screw**

Multicolor oak 7033/Wood effect

Highest absorber class possible

On wooden battens including
insulating material 40 mm:
On wood battens:
Glued to the wall:

Absorber class A – 95% sound absorption
Absorber class C – 65% sound absorption
Absorber class D – 30% sound absorption
